PROFESSIONAL EXPERIENCE

Mosaic AI | Solutions Engineer Toronto, ON | 2025 - Present

- Own a **\$1.5M+ revenue book** across discovery, pilots, implementation, customer success and expansion.
 - Closed several **\$100K+ deals** and took customers live in **under two weeks** from pilot kickoff.
- Designed an **agent creation, testing and orchestration loop** driven by production feedback.
 - Cut **cost 30% and runtime 53%** through prompt and payload fixes on one agent (same input and model).
 - Built Python/Langfuse monitoring and daily archives for 40+ production agents.
 - Traced **20% of recorded fleet model cost** to miscounted image tokens; worked with engineering on the fix.
- Drove **20+ platform fixes** with engineering by reproducing customer bugs and proposing solutions.

Coveo | Solutions Engineer Toronto, ON | 2024 - 2025

- Contributed to **\$1M+ in closed revenue** through discovery, technical demos and solution validation.
- Led generative AI solution design for Fortune 500 ecommerce and enterprise knowledge applications.

Havas | Web Developer Toronto, ON | 2022 - 2024

- Migrated a Fortune 500 retailer to Shopify Plus with a Next.js frontend and Contentful integration.

Bounteous | Ecommerce Developer Toronto, ON | 2021 - 2022

- Built Shopify Plus ecommerce sites for Fortune 500 clients.

Gorilla Group | Ecommerce Developer Montreal, QC | 2020 - 2021

- Developed SAP Hybris and Adobe Experience Manager websites for enterprise retailers.

CloudOps | Cloud Developer Intern Montreal, QC | Summer 2019

- Designed a Vue.js interface for monthly cloud-cost estimates and annual budget planning.

Index Exchange | Software Engineer Intern Montreal, QC | Summer 2018

- Built a Kafka and Go pipeline to analyze historical digital ad auction data.

IBM | Technical Presales Intern Montreal, QC | 2017 - 2018

- Helped sell the Watson AI suite to enterprise customers.
 - Cut manual refund inspections by **over 20%** with a Watson AI refund-review tool.

INDEPENDENT PROJECTS

Inbox Distiller | Developer Toronto, ON | 2026

- Built an app that extracts principles from newsletters, with a second AI model challenging the conclusions.
 - Next.js, Vercel, PostgreSQL, Redis | Multi-model pipeline, cron health checks, stale-lock recovery.

Ecommerce Development | Self-Employed Toronto, ON | 2019 - 2025

- Served **approximately 20 ecommerce clients**, providing consulting and development.
- Sole Shopify developer for a **\$10M+** premium menswear retailer with online and in-store operations.
